Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-3, 5-17, 20-22, 25-29, 31-43, 46-47, 51-52, and 56-61 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an image analysis method comprising the steps of determining a relationship between first and second image regions of a plurality of image regions of a first and second frames based on a probabilistic correlation between occurrences of a first object being present in a first image region and occurrences of a second object being present in the second image region and a lift associated with the first object being present in the first image region and the second object being present in the second image region.

The lift is defined on pages 20-21 of paragraphs [0063-0064] in the Detailed Description.

It is noted that the closest prior art of record (Sacks et al. US Patent no. 4,739,401) teaches a similar image analysis method, however, Sacks fails to particularly teach or suggest *"a relationship between first and second image regions of a plurality of image regions of a first and second frames based on a probabilistic correlation between occurrences of a first object being present in a first image region and occurrences of a second object being present in the second image region and a lift associated with the first object being present in the first image region and the second object being present in the second image region. "* as specified in the claims.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
